

AN
ESSAY
ON THE
PRINCIPLE OF POPULATION,
AS IT AFFECTS
THE FUTURE IMPROVEMENT OF SOCIETY.
WITH REMARKS
ON THE SPECULATIONS OF MR. GODWIN,
M. CONDORCET,
AND OTHER WRITERS.

LONDON:

PRINTED FOR J. JOHNSON, IN ST. PAUL'S

CHURCH-YARD

1798.

PREFACE.

THE following Essay owes its origin to a conversation with a friend, on the subject of Mr. Godwin's essay on avarice and profusion, in his Enquirer. The discussion started the general question of the future improvement of society, and the Author at first sat down with an intention of merely stating his thoughts to his friend, upon paper, in a clearer manner than he thought he could do in conversation. But as the subject opened upon him, some ideas occurred, which he did not recollect to have met with before ; and as he conceived that every least light, on a topic so generally interesting, might be received with candour, he determined to put his thoughts in a form for publication.

The Effay might, undoubtedly, have been rendered much more complete by a collection of a greater number of facts in elucidation of the general argument. But a long and almost total interruption from very particular business, joined to a desire (perhaps imprudent) of not delaying the publication much beyond the time that he originally proposed, prevented the Author from giving to the subject an undivided attention. He presumes, however, that the facts which he has adduced will be found to form no inconsiderable evidence for the truth of his opinion respecting the future improvement of mankind. As the Author contemplates this opinion at present, little more appears to him to be necessary than a plain statement, in addition to the most cursory view of society, to establish it.

to believe what he wishes, without evidence, or to refuse his assent to what might be unpleasing, when accompanied with evidence.

The view which he has given of human life has a melancholy hue, but he feels conscious that he has drawn these dark tints from a conviction that they are really in the picture, and not from a jaundiced eye or an inherent spleen of disposition. The theory of mind which he has sketched in the two last chapters accounts to his own understanding in a satisfactory manner for the existence of most of the evils of life, but whether it will have the same effect upon others must be left to the judgement of his readers.

If he should succeed in drawing the attention of more able men to what he conceives to be the principal difficulty

CONTENTS.

CHAP. I.

Question stated—Little prospect of a determination of it, from the enmity of the opposing parties — The principal argument against the perfectibility of man and of society has never been fairly answered—Nature of the difficulty arising from population—Outline of the principal argument of the Essay. p. 1.

CHAP. II.

The different ratio in which population and food increase—The necessary effects of these different ratios of increase—Oscillation produced by them in the condition of the lower classes of society —Reasons why this oscillation has not been so much observed as might be expected—Three propositions on which the general argument of the Essay depends —The different states in which mankind have been known to exist proposed to be examined with reference to these three propositions. p. 18.

CHAP. III.

The savage or hunter state shortly reviewed—The shepherd state, or the tribes of barbarians that overran the Roman Empire—The superiority of the power of population to the means of subsistence—the cause of the great tide of Northern Emigration. p. 38.

CHAP. IV.

State of civilized nations —Probability that Europe is much more populous now than in the time of Julius Caesar—Best criterion of population—Probable error of Hume in one the criterions that he proposes as assisting in an estimate of population—Slow increase of population at present in most of the states of Europe —The two principal checks to population—The first, or preventive check examined with regard to England. p. 52.

CHAP. V.

The second, or positive check to population examined, in England—The true cause why the immense sum collected in England for the poor does not better their condition—The powerful tendency of the poor laws to defeat their own purpose—Palliative of the distresses of the poor

proposed—The absolute impossibility, from the fixed laws of our nature, that the pressure of want can ever be completely removed from the lower classes of society—All the checks to population may be resolved into misery or vice. p. 69.

CHAP. VI.

New colonies —Reasons for their rapid increase—North American Colonies —Extraordinary instance of increase in the back settlements —Rapidity with which even old states recover the ravages of war, pestilence, famine, or the convulsions of nature. p. 99.

CHAP. VII.

A probable cause of epidemics —Extracts from Mr. Sueßmilch's tables —Periodical returns of sickly seasons to be expected in certain cases —Proportion of births to burials for short periods in any country an inadequate criterion of the real average increase of population—Best criterion of a permanent increase of population—Great frugality of living one of the causes of the famines of China and Indostan —Evil tendency of one of the clauses in Mr Pitt's Poor Bill—Only one proper way of encouraging population—Causes of the Happiness
